EDUCATION

B.Tech in Computer Science & Engineering <i>National Institute of Technology, Srinagar — Currently in 3rd Year</i>	2023 – 2027
Senior Secondary (Class XII) — CBSE <i>AV Public School, Fazilka, Punjab PCM Stream 92%</i>	2022
Secondary (Class X) — CBSE <i>Chanakya School, Fazilka, Punjab 91.2%</i>	2020

INTERNSHIPS

Website Manager Intern — Bramahastra Cyber Security - Overseeing end-to-end management of the company website, including content updates, performance optimization, and ensuring a seamless user experience. - Coordinating with cross-functional teams to align web content with the organization's cybersecurity services and brand identity. - Monitoring website analytics and implementing improvements to enhance overall visibility and engagement.	May 2026 – Present
Python Developer Intern — Elevate Labs - Developed and optimized Python-based solutions involving data structures, algorithms, and backend logic, contributing to real-world problem-solving workflows. - Applied software development best practices in a professional setting, demonstrating strong analytical thinking and the ability to deliver results under guidance.	December 2025

PROJECTS

Netflix Movies & TV Shows Analysis (EDA) Python, Pandas, Matplotlib, Seaborn - Conducted end-to-end exploratory data analysis on a large-scale Netflix dataset, handling missing values, duplicates, and inconsistencies to ensure data integrity. - Engineered visualizations to uncover trends across genres, content-producing countries, and release years, translating raw data into actionable business insights. - Identified key patterns in content distribution and audience targeting strategies used by Netflix over time.
Sales Data Analysis MySQL - Designed and executed complex SQL queries using joins, aggregations, window functions, and subqueries to analyze multi-dimensional sales data. - Identified top-performing products, high-value customers, and seasonal revenue trends to support strategic business decisions. - Structured findings into a clear analytical report highlighting KPIs and growth opportunities.
Quiz Generator and Analyzer Python - Architected a dynamic Python application to generate subject-specific quiz questions and administer timed assessments. - Implemented a performance analytics module with scoring algorithms, accuracy metrics, and result visualizations to track user progress over time. - Designed a modular codebase to allow easy extension of question banks and difficulty levels.

SKILLS

Languages	C, C++, Python (NumPy, Pandas, Matplotlib, Seaborn), JavaScript, Java
Web Dev	HTML, CSS, JavaScript, React, Node.js
Databases	MySQL, MongoDB
Tools	Git, VS Code
Domains	Data Science & Analysis, Machine Learning, NLP
Soft Skills	Strategic Thinking, Collaboration, Client Communication

ACTIVITIES & ACHIEVEMENTS

- Active member of the Performance Team at the Annual Cultural Fest (September 2025), contributing to event coordination and stage performances. - Secured 2nd Place in 'Guess the Programming Language' — a competitive technical event held during the college tech fest, demonstrating strong programming language proficiency.
